SUMMARY

Electrical engineer with 3+ years in industrial automation, now transitioning into Full Stack Development. Trained through the Axsos Academy Full Stack Developer Bootcamp (660+ coding hours) in web fundamentals, Python and Django, MySQL, and algorithms and data structures. Brings strong debugging and root-cause problem-solving from programming PLC/SCADA systems on live production lines. Seeking a junior full stack developer role.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Responsive Design | **Backend:** Python, Django, Flask, OOP, MVC Architecture, REST APIs, Authentication & Sessions | **Databases:** MySQL, Database Design (ERD), CRUD Operations | **Computer Science:** Algorithms, Data Structures, Problem Solving (LeetCode, HackerRank) | **Tools & Practices:** Git, GitHub, VS Code | **PLC & Automation:** Siemens PLC (TIA Portal), SCADA, HMI, Zelio Soft, EcoStruxure; VFDs, Industrial Communication Protocols, Classic Relay Control, Pneumatics, Motors, Pumps, Compressors | **Engineering Software:** TIA Portal, AutoCAD, Automation Studio, SoMove.

TECHNICAL PROJECTS

PV SYSTEM OPTIMIZATION PERFORMANCE STUDY | *Graduation Project* | Birzeit University
Study and calculator tool for optimal placement of photovoltaic panels

- Analyzed PV panel placement in the northern hemisphere to maximize output while minimizing shading.
- Developed a set of design recommendations for optimal panel orientation based on project location.
- Built an automatic calculator that takes a project's location as input and outputs the best panel orientation.

PROFESSIONAL EXPERIENCE

AUTOMATION ENGINEER | *Golden Wheat Mills* | Palestine SEP 2025–PRESENT

- Replacing legacy PLC and SCADA systems with a new platform in collaboration with Swiss Bühler Group.
- Installed and commissioned new packaging and wrapping machines on the production lines.
- Upgraded production lines with modern control systems, improving reliability and performance.

MAINTENANCE ENGINEER | *National Beverage Company (NBC)* | Palestine MAY 2023–SEP 2025

- Designed, programmed, and troubleshoot PLCs and HMI screens to improve automation and monitoring.
- Configured VFDs and industrial communication protocols to optimize motor performance and efficiency.
- Maintained the main PET blow-molding machine and supported thermoforming on Coca-Cola/Cappy lines.
- Maintained pneumatic systems, motors, pumps, and air compressors to minimize production downtime.
- Applied classic relay control techniques while ensuring compliance with safety and quality standards.

EDUCATION

Axsos Academy | *Full Stack Developer Bootcamp* | Palestine 2026

- Part-time immersive program: 20 weeks and 660+ coding hours covering web fundamentals (120 hrs), Python (240 hrs), algorithms and data structures (60 hrs), and 2 complete solo and group projects (60 hrs), with group activities and LeetCode/HackerRank practice across all stacks.

BIRZEIT UNIVERSITY | *B.Sc. in Electrical Engineering* | Ramallah, Palestine 2018–2023

- Relevant Coursework: Power Systems & Protection, Electrical Machines & Drives, Renewable Energy & PV Systems, Control Systems, Signals, Advanced Digital

PROFESSIONAL TRAINING | *Industrial Automation & Electrical Courses* | Palestine

- Siemens PLC Course (TIA Portal); Advanced PLC Programming & SCADA; Maintenance Engineering & Control Panel Design; Lighting Systems (Interior & Exterior) – Design & Supervision.
